

# Table of Contents

Introduction .....	1
Reading Tips .....	1
Content .....	3
1. About Perl 6 .....	5
1.1. Rakudo Perl 6 .....	5
1.2. REPL .....	6
1.3. One Liners .....	7
1.4. Running Programs .....	8
1.5. Error messages .....	9
1.6. use v6 .....	9
1.7. Documentation .....	9
1.8. More Information .....	11
1.9. Speed .....	11
2. Variables, Operators and Values .....	13
2.1. Output with say and print .....	13
2.2. Variables .....	13
2.3. Comments .....	16
2.4. Non-destructive operators .....	17
2.5. Numerical Operators .....	18
2.6. Operator Precedence .....	19
2.7. Values .....	21
2.8. Variable Names .....	23
2.9. constant .....	24
2.10. Sigilless variables .....	24
2.11. True and False .....	25
2.12. // .....	28
3. The Type System .....	31
3.1. Strong Typing .....	31
3.2. ^mro (Method Resolution Order) .....	33
3.3. Everything is an Object .....	34
3.4. Special Values .....	36
3.5. :D (Defined Adverb) .....	38
3.6. Type Conversion .....	40
3.7. Comparison Operators .....	41
4. Control Flow .....	47
4.1. Blocks .....	47
4.2. Ranges (A Short Introduction) .....	47
4.3. loop .....	48

4.4. for	49
4.5. Infinite Loops	52
4.6. while	52
4.7. until	53
4.8. repeat while	54
4.9. repeat until	55
4.10. if	55
4.11. given	56
4.12. with	57
4.13. ?? !!	60
4.14. do	61
4.15. when	61
4.16. Loop Manipulation	62
5. Numbers	67
5.1. Octal, Hex, Binary ...	67
5.2. Unicode Numbers	68
5.3. Not a Number	68
5.4. N_U_M_B_E_R_S	69
5.5. Floating Point Numbers	69
5.6. Rational Numbers	70
5.7. narrow	71
5.8. sign	71
5.9. Rounding	71
5.10. NaN (Not a Number)	73
5.11. =~	73
5.12. is-prime (Prime Numbers)	74
5.13. Modulo and variants	74
5.14. Other Operators	75
6. Basic Input and Output	79
6.1. Newlines	79
6.2. Stringification	80
6.3. Output	82
6.4. printf	84
6.5. Input from the user	88
7. Strings	91
7.1. Unicode	91
7.2. join	95
7.3. split	95
7.4. words	96
7.5. comb	96
7.6. flip	97

7.7. substr (Partial Strings)	97
7.8. Changing Case	99
7.9. x (String Repetition Operator)	101
7.10. succ	101
7.11. pred	102
7.12. Quoting	103
7.13. Multi-line Strings (Heredocs)	104
8. Arrays and Lists	107
8.1. , (List Operator)	107
8.2. [ ] (Array Constructor)	108
8.3. Empty	108
8.4. elems (List Size)	108
8.5. List Elements	109
8.6. pop / push / shift / unshift	110
8.7. List of Lists	111
8.8. Flattening Lists	111
8.9. map	112
8.10. sort	114
8.11. reverse	115
8.12. Array with Limits	116
8.13. Typed Array	116
8.14. Shaped Array	116
8.15. unique (Lists Without Duplicates)	118
8.16. rotate (List Rotation)	118
8.17. xx (List Repetition Operator)	119
8.18. List Selection	119
8.19. min / max	122
8.20. Random Values	122
8.21. splice	126
8.22. permutations	127
8.23. combinations	128
9. Pair and Hashes	129
9.1. Pair	129
9.2. Hash	130
9.3. Hash Constructor { }	131
9.4. Hash Assignment:	132
9.5. Hash Values	132
9.6. keys	132
9.7. values	133
9.8. kv (keys + values)	133
9.9. Typed Hash	134

9.10. Shaped Hash	135
9.11. invert	136
9.12. antipairs	136
9.13. Hash Slices	137
9.14. Hash Lookup	137
9.15. Hash Deletion	138
9.16. Hash Duplicate Values	138
9.17. Hash Usage	139
9.18. Grep and Smartmatch	140
9.19. Hash (method)	140
10. Procedures	143
10.1. Procedures Without Arguments	143
10.2. Procedures With Arguments	143
10.3. @_	144
10.4. Placeholder Variables	144
10.5. Procedures as variables	145
10.6. Type Constraints	146
10.7. return	147
10.8. @*ARGS	149
10.9. MAIN	150
10.10. WHY	151
10.11. Multiple Dispatch	154
10.12. IntStr Gotcha	156
10.13. Procedure Arguments	157
10.14. * (Slurpy Operator)	163
10.15. Blocks Revisited	167
10.16. Calling a procedure specified in a variable	168
10.17. Procedures in Procedures	168
10.18. Syntax Summary	168
11. Regex Intro	171
11.1. Making a Regex	171
11.2. ~~ (Smartmatch Operator)	172
11.3. Partial Strings	172
11.4. Beginning or end of a string	174
11.5. Regex Metacharacters	175
11.6. \$/ (Match Object)	176
11.7. Special Characters	176
11.8. Capturing and Grouping	177
11.9. Character Classes	179
11.10. Custom Character Classes	182
11.11. Non-greedy	182

11.12. Backwards References .....	183
11.13. Making a Regex (Part 2) .....	184
11.14. String Substitution .....	184
11.15. Substitution Tuning .....	188
11.16. Transliteration .....	188
11.17. trim / trim-leading / trim-trailing .....	190
11.18. split and grep .....	191
11.19. Comments .....	191
12. Modules .....	193
12.1. Precompilation .....	193
12.2. Module Administration with zef .....	193
12.3. Using Modules (use) .....	197
12.4. Writing Modules .....	199
13. Files and Directories .....	201
13.1. Reading Files .....	201
13.2. slurp .....	203
13.3. open / lines / close .....	204
13.4. INPUT OUTPUT - IO .....	205
13.5. Writing Files .....	205
13.6. get .....	207
13.7. Temporary Files .....	210
13.8. File tests .....	212
13.9. Binary Files .....	213
13.10. Directories .....	219
14. Date and Time .....	227
14.1. time .....	227
14.2. now .....	227
14.3. Leap Seconds .....	227
14.4. Instant .....	228
14.5. Timing .....	234
15. Ranges and Sequences .....	237
15.1. Ranges .....	237
15.2. Sequences .....	241
15.3. state .....	245
15.4. Truly Random Flip-Flop .....	246
15.5. Flip-Flop Problems .....	246
15.6. gather / take .....	247
15.7. Closures .....	251
16. Classes .....	255
16.1. has .....	255
16.2. new .....	255

16.3. method	256
16.4. Named Arguments	259
16.5. Public Class Variables	259
16.6. self	259
16.7. Custom «new»	259
16.8. Custom BUILD	260
16.9. Wrong Start Value	261
16.10. Object Comparison	262
16.11. A Person Class	264
16.12. Output	268
16.13. Private Methods	271
16.14. Inheritance	273
16.15. Roles	276
16.16. Multiple Dispatch	278
16.17. A Fallback Method	279
16.18. .?	282
16.19. .+	282
16.20. .*	283
16.21. handles (Delegation)	284
16.22. Calling a method specified in a variable	285
17. Writing a Module	287
17.1. unit module	287
17.2. is export	287
17.3. pm6	287
17.4. use lib	288
17.5. Timing Fibonacci	289
17.6. Dictionaries	291
Appendix 1. Docker	293
Installing Rakudo Star with Docker	293
Appendix 2. Solutions	297
Chapter 1	297
Chapter 2	297
Chapter 3	298
Chapter 4	299
Chapter 5	300
Chapter 7	302
Chapter 8	304
Chapter 9	306
Chapter 10	307
Chapter 11	308
Chapter 12	311

Chapter 13 .....	312
Chapter 14 .....	319
Chapter 15 .....	321
Chapter 16 .....	321
Chapter 17 .....	325
Appendix 3. Beware of .....	329
A3.1 length .....	329
A3.2 Objects are not strings .....	329
A3.3 See also .....	329
Appendix 4. Perl 6 Background and History .....	331
6.a and 6.b .....	331
6.c .....	331
6.d .....	331
xxxx .....	331
Index .....	333
